Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1-32 (Canceled)

- 33. (Currently amended) A method for delivering monomeric or dimeric insulin to a patient in need thereof, comprising administering to the patient a delivery formulation for the monomeric or dimeric insulin comprising an effective amount of insulin complexed with a diketopiperazine derivative, wherein the delivery formulation is prepared by complexing the insulin with microparticles of the diketopiperazine derivative by the steps of:
- providing pre-formed microparticles of the diketopiperazine derivative in a suspension comprising a solvent:
 - adding insulin to said suspension; and b)
 - removing solvent from said suspension; c)

wherein the diketopiperazine derivative has the formula 2.5-diketo-3.6-di(4-Xaminobutyl)piperazine, wherein X is selected from the group consisting of fumaryl, succinvl, maleyl, and glutaryl, and

wherein the microparticles release monomeric or dimeric insulin upon dissociation.

- 34. (Canceled)
- 35. (Previously presented) The method of claim 33 wherein X is fumaryl.
- 36. (Previously presented) The method of claim 33 wherein X is succinvl.
- 37. (Previously presented) The method of claim 33 wherein X is malevl.
- 38. (Previously presented) The method of claim 33 wherein X is glutaryl.
- 39. (Previously presented) The method of claim 33 wherein the composition is in a dry powder form administered to the lungs via inhalation.

Appl. No.: 10/719.734 Patent 1951300-00060

Art Unit: 1616

Reply to Office Action of March 23, 2009

40. (Previously presented) The method of claim 33 wherein the patient is a Type II diabetic.

- (Currently amended) The method of claim 40 wherein the composition is administered concurrently with[[,]] or less than 20 minutes prior to[[,]] the patient eating a meal.
- 42. (Previously presented) The method of claim 33 wherein the composition is provided in one or more unit doses of insulin, each dose equivalent to about 6 IU of insulin.
- (Previously presented) The method of claim 33 wherein said solvent is an 43: aqueous solvent.
- 44. (Previously presented) The method of claim 33 wherein said solvent is removed by lyophilizing or freeze drying.
